

burns WDF; and Union Carbide Corporation, a company that uses cement kilns to handle wastes produced manufacturing petrochemicals. These commenters generally noted advantages that accrue from recovering energy from waste by burning it as fuel in kilns, asserted that petitioners had not provided sufficient evidence of increased risk, and cited the current regulatory requirement for labeling.

IX. Disposition of Petition

Based upon (a) the lack of convincing evidence that WDF contributes materially to the hazards posed by cement; and (b) the fact that current OSHA regulations already require virtually everything petitioners request, other than a reference to WDF, the petition is denied.
